Readings in Management

There are no required readings in Management before you come up. However, the following books do give you some further insight into what you will be studying and it would be good if you are able to read a couple of them.

Note: these books are listed in no particular order!

Understanding Organisations by Charles Handy (1993)

Thinking Fast and Slow by Daniel Kahnemann (2011)

The Company by Micklethwait and Wooldridge (2003)

The Corporation by Joel Bakan (2004)

How the Mighty Fall by James Collins (2009)
